

# Transform Your Hospital Transportation

Are you ready to turn your hospital shuttle service from an operational headache to a patient care success? With Peak Transit, you're not just managing vehicles; you're facilitating better healthcare access.

**Hospital transportation can be challenging.**

Irregular shuttle timings, unknown passenger counts, inefficient communication tools, and more, result in overwhelmed staff and frustrated patients and visitors.

## Un-complicate with Peak Transit

**Simple-to-Use CAD/AVL Software:** Enhance your shuttle management with straightforward scheduling tools and the ability to quickly adapt service plans, ensuring operational efficiency and reliability

**Custom-Branded Passenger Apps:** Provide real-time shuttle updates directly in the hands of patients and visitors, enhancing their experience with convenient access to transport timings and location updates.

**Mobile Data Terminals:** Equip your hospital fleet with sophisticated terminals, improving communication and logistical support for drivers, enhancing patient satisfaction with timely pickups.

**Automatic Passenger Counting:** Utilize precise data to optimize shuttle usage and streamline patient flow, supporting efficient transport and reduced waiting times.

**Digital Signage:** Inform and guide patients and visitors with dynamic, real-time displays, enhancing their experience with current shuttle information.

**Automatic Voice Announcements:** Ensure clear, consistent messaging to assist patients and visitors, providing essential information smoothly throughout their journey.
