

Your Path to an Adaptive Campus Transit Experience

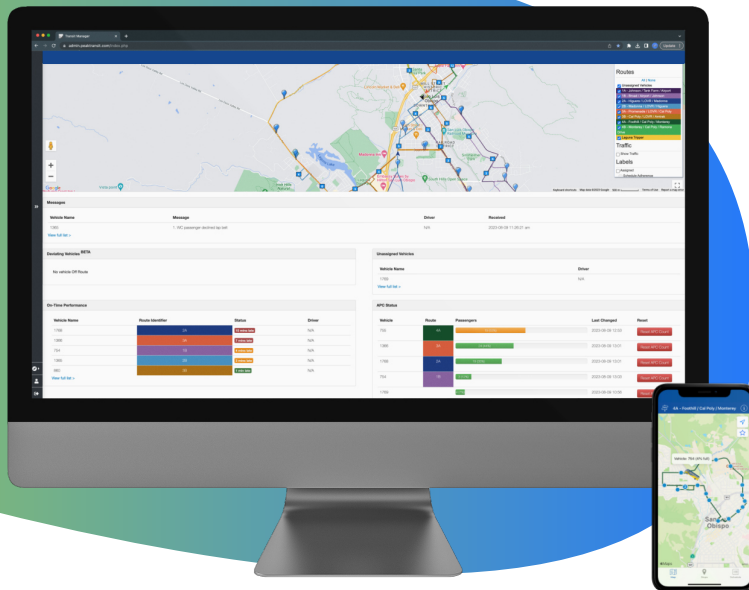

Ready to transform campus commutes into a seamless experience? With Peak Transit, craft remarkable journeys for all and effortlessly navigate campus changes with the ability to self-manage detours directly in our software.

Campus transit can be intricate & unpredictable.

From inconsistent shuttle schedules to uncertain ridership numbers and outdated technology, these issues can frustrate both drivers and passengers.

Simplify with Peak Transit

Intuitive CAD/AVL Software for Educational Institutions: Enjoy drag-and-drop route planning, efficient timetable adjustments, and straightforward creation of blocks and paddles for total route management.

Custom-Branded Campus Transit Apps: Deliver real-time shuttle info directly to students' smartphones, enhancing their campus experience with easy access to schedules and updates.

Mobile Data Terminals for University Fleets: Outfit your shuttles with cutting-edge terminals to streamline communication and data management for drivers, boosting operational efficiency.

Automatic Passenger Counting for Data-Driven Decisions: Leverage accurate data to adjust capacity and plan shuttle routes smartly, ensuring your campus transit operations are based on solid information.

Digital Signage for Dynamic Campus Communication: Keep students and faculty informed with lively, real-time displays, improving their daily commute with current travel information and notifications.

Automated Voice Announcements for Consistent Messaging: Ensure every passenger receives uniform, clear information, making essential announcements effectively throughout their ride.
